Exam 2 Review Guide

Chapter 5 Slides (Prejudice and Discrimination)

- Know the differences between stereotypes, prejudice, and discrimination.

- What is implicit prejudice (e.g., implicit racism, sexism, etc.)?

- What are implicit Association tests? How are these tests used to measure implicit prejudice? (Also be familiar with at least one potential problem associated with these tests)

- Be familiar with the gender wage gap

- What is stereotype threat? Does a person have to believe in a stereotype for it to affect them?

- What is social categorization? How does this process lead to prejudice/discrimination?

- What is the outgroup homogeneity effect? Why does it occur?

- From an evolutionary standpoint, why do we perceive members of outgroups differently?

- Know the relationship between confirmation bias/self-fulfilling prophecies and prejudice/discrimination

- What is Allport's contact hypothesis? What four conditions need to be met?

- Be familiar with internally driven vs. externally driven motivations for controlling prejudice

Chapter 6 Slides (Attitudes)

- How do social psychologists define “attitude?” Know that attitude formation is usually an automatic process.

- What are the four possible attitude types?

- How are attitudes typically measured?

- What are the two routes of persuasion? Be able to name them and compare/contrast

- What factors potentially affect each persuasion route?

- How do sources of information affect attitude formation?

- What is the sleeper effect?

- What are subliminal messages? Are they effective? If so, when are the most likely to be effective?

- What is “need for cognition” (NC)? How is NC related to persuasion?

- What is cognitive dissonance? How do people try to reduce it?

- Be familiar with Festigner and Carlsmith’s classic study on cognitive dissonance. What did the researchers do? What were their main findings? What did they conclude?

Chapter 7 – Conformity Slides

- What is social influence?

- What is the chameleon effect? What does it tell us about social influence?

- Be familiar with Asch's line study. What was the procedure and what was the main finding? What are the implications?

- What is ostracism? What are potential negative effects?

- Know the difference between public and private conformity

- What is the norm of reciprocity? How does this lead to behavior changes?

- Be familiar with the four sequential request strategies ("foot-in-the-door", "lowballing", "door-in-the-face", and "that's-not-all"). Be able to describe each strategy and provide an example.

- What is obedience? How does it differ from conformity and compliance?

- Be able to describe Stanley Milgram's obedience study. What was the procedure? What were his primary findings? What do these findings tell us about obedience? What factors made participants less likely to go along with the experimenter?
