PSYC 3233 Exam 3 Topics

Socio-emotional Development (Chapter 11)

- What is the difference between basic (primary) emotions and complex emotions? Be able to identify examples of each.
- What is temperament?
    - Be familiar with the three dimensions of temperament discussed at the beginning of these slides
    - Is temperament stable across the life-span?
- What is a psychological attachment? How do attachments form?
    - Be familiar with Bowlby's Ethological Theory of Attachment
- Be able to describe Mary Ainsworth's strange situation paradigm
- Know the difference between secure and insecure attachments
    - Be able to identify the four types of attachments discussed on slides
- How do infant attachments potentially impact later relationships in adulthood?
- How do parent-child attachments change throughout childhood and into adolescence?
- Know the two dimensions of parenting style discussed in class. How do they combine into the four parenting archetypes? I'll probably make you draw and label the chart….
- How do the different parenting styles potentially affect children's development?
- How is parenting style related to children's/adolescents' autonomy?
- How does marital satisfaction change over the lifespan?

The Self and Personality (Chapter 11)

- How do psychologists define personality?
- Know the difference between self-concept, self-esteem, and identity
- What is the trait approach to psychology?

    - How are personality traits measured?
    - According to the Big Five, what five traits make up human personality? Be able to define each of these traits and know how they relate to each other

- What is the mirror test? How is this test used to assess identify formation?
- How does identity change through the life-span?
- Be familiar with Erikson's "identify vs. role confusion" stage
- Know the four stages of identity development discussed in this chapter.
- How does self-concept change as we age?
- How does self-esteem change over the life-span?
- How does temperament relate to Big-Five personality traits?
- What is the "seasons of life" approach to personality?
- Be familiar with Erikson's "identity vs despair" stage

Moral Development (Chapter 12)

- What are the three basic components of morality discussed at the beginning of this chapter?
- Who was Lawrence Kohlberg? How did he study moral development?
- What is the Heinz dilemma?
- Be familiar with Kholberg's phases of moral development, including the three stages.
- What is moral reasoning?
- Be able to define empathy and provide at least one example
- What is the difference between prosocial and antisocial behavior?
- Be familiar with the three types of aggression discussed on in this chapter

Death and Dying (Chapter 16)

- How do psychologists define biological death?
    - What criteria must be met for an individual to be judged dead?
- Know the difference between higher-level and lower-level brain activity.
- What is persistent vegetative state? How does this differ from traditional death?
- Know the leading cause of death for each age group discussed
- Be familiar with Kubler-Ross's five stages of dying. You should be able to list the stages and provide examples
    - What are the criticisms of Kubler-Ross's stages?
- Know the differences between bereavement, mourning, and grief
- What is posttraumatic growth? How is it related to bereavement?
