PSYC 3233 Exam 4 Topics

Chapter 11

- How do psychologists define personality?
- Know the difference between self-concept, self-esteem, and identity
- What is the trait approach to psychology? (slide 5)
    - How are personality traits measured?
    - According to the Big Five, what five traits make up human personality? Be able to define each of these traits and know how they relate to each other
- What is the mirror test? How is this test used to assess identify formation?
- How does identity change through the life-span?
- Be familiar with Erikson's "identify vs. role confusion" stage (slide 13)
- Know the four stages of identity development discussed on slide 15
- How does self-concept change as we age?
- How does self-esteem change over the life-span?
- How does temperament relate to Big-Five personality traits? (Slide 30)
- What is the "seasons of life" approach to personality?
- Be familiar with Erikson's "identity vs despair" stage (slide 37)

Chapter 12

- What are the three basic components of morality discussed on slide 2?
- Who was Lawrence Kohlberg? How did he study moral development?
- Be familiar with Kholberg's phases of moral development, including each of the 6 stages (2 stages per phase) (Slides 6-8)
- What is moral reasoning?

- Be able to define empathy and provide at least one example
- What is the difference between prosocial and antisocial behavior?
- Be familiar with the three types of aggression discussed on slide 17

Chapter 14

- Why is it difficult for psychologists to define "families"?
- Be familiar with family systems theory (slide 3)
- Be familiar with the trends discussed on slides 4 and 5
- Know the two dimensions of parenting style discussed on slide 10. How do they combine into the 4 types of parenting described on slide 11?
- Be able to identify the 4 types of parenting on slide 11. I'll probably make you draw and label the chart….
- How do the different parenting styles on slide 11 affect children's development?
- How is parenting style related to children's/adolescents' autonomy? (slide 17)
- How does marital satisfaction change over the lifespan?
- Be familiar with various changes in family dynamics over the lifespan
    - Aging children/parents
    - Boomerang children and empty nests
    - The transition into grandparenthood

Chapter 16

- How do psychologists define biological death?
    - What criteria must be met for an individual to be judged dead? (slide 3)
- What is persistent vegetative state? How does this differ from traditional death?
- Know the leading cause of death for each age group discussed on slide 12

- What are “programmed” theories of aging? How do these theories differ from “damage” theories?

- Be familiar with the Hayflick limit and telomeres. What is one criticism of this theory? (slide 14)

- Be familiar with Kubler-Ross’s five stages of dying. You should be able to list the stages and provide examples

    - What are the criticisms of Kubler-Ross’s stages?

- Know the differences between bereavement, mourning, and grief (slide 31)

- What is posttraumatic growth? How is it related to bereavement?
